**Delivering the highest quality of journalism in occupational safety and health since 1971.**

# Occupational Safety & Health Reporter

Published since OSHA was founded in 1971, the *Occupational Safety & Health Reporter*<sup>SM</sup> is an indispensable asset for safety professionals in both the private and public sectors.

## Key features include

Original reporting on breaking news, special reports, and latest developments, including all major legislative, regulatory, and judicial developments relating to job safety, from our network of national and international correspondents.

- **Practitioner insights** provide in-depth analysis from leading experts, who give our readers cutting-edge perspectives on new and emerging issues.
- **Access to cited primary source documents** (court opinions, reports, federal register documents, legislation, agency documents, and more). Primary source documents include:
  - New and amended statutes
  - Proposed and final rules
  - Litigation and enforcement actions
  - Activities of the Occupational Safety and Health Administration and other government agencies
  - Research programs in the public and private sectors
  - Union initiatives
  - Occupational Safety and Health Review Commission rulings, notices of contest, decisions, and final orders
- **Key interviews** with policy makers, government officials, and industry experts.
- Bloomberg Environment's annual **Occupational & Safety Health Outlook** delivers expert insights on critical developments relating to OSHA policy, chemical safety board, NIOSH agenda, Review Commission, and state plans. The report also includes graphs and charts detailing trending enforcement data, including inspection and penalty summaries as well as a timeline for major OSHA rules in the coming year.
- **Customizable emails** to receive news in your inbox at the frequency that works for you.
- **Tailored alerts** to receive news on developing stories based on your selected topics and locations.
