Notes

Software Compatibility Matrix

The following document contains further information on supported Windows Operating Systems and Microsoft Office versions.

Office Tools Installer

The installer for this component contains support for both 32-Bit and 64-Bit versions of the Microsoft Office product. The package will detect which version of Microsoft Office is installed on the workstation and then install the appropriate package.

For any client wishing to extract the separate installers, the bxlammddyyyy.exe installer supports a /s/o switch that will copy two files (bxlaupd_32.exe and ot64upd.exe) into the \blp\Wintrv directory.
