Notes

NEW Bloomberg Installer (sotr05072018.exe)

With this release, we are introducing a new installer engine for the Bloomberg Professional Service. This single installer will replace the following existing Wise installation packages on www.BloombergSoftware.com: “New Installation” (sotrMMDDYYYY.exe) and “Upgrade All Components” (bupdMMDDYYYY.exe). This installer will continue to support customized unattended installations. To locate the instructions, please complete an attended installation and find “%TEMP%\Bloomberg Silent Installation.txt” on the target system. In an upcoming release, we will add a command line variable to the installer to extract this file without having to complete an installation first.

Software Compatibility Matrix

The following document contains further information on supported Windows Operating Systems and Microsoft Office versions.

Office Tools Installer

The installer for this component contains support for both 32-Bit and 64-Bit versions of the Microsoft Office product. The package will detect which version of Microsoft Office is installed on the workstation and then install the appropriate package.

For any client wishing to extract the separate installers, the bxlammddyyyy.exe installer supports a /s/o switch that will copy two files (bxlaupd_32.exe and ot64upd.exe) into the \blp\Wintrv directory.
