OVERVIEW

Starting May 2013, Bloomberg users will be able to use their iPad for Bloomberg Transactional Products within Terminal Mode.

MINIMUM REQUIREMENTS

- iOS version 5.0 or above.
- Bloomberg Anywhere for iPad version 2.4.1 or higher.
- Data Connection*.
- Bloomberg B-Unit.
- Data connection.
- MDID (Mobile Device Identifier) installed.

* Bloomberg Anywhere Terminal mode requires a stable and consistent data connection. Poor connectivity will affect the application’s performance.
HOW TO CHECK THE VERSION OF THE BLOOMBERG ANYWHERE APP

1. Verify that Bloomberg Anywhere for iPad version 2.4.1 or later has been installed.
2. Check this by opening the Bloomberg Anywhere app. At the log in screen, the version is shown above the ‘Username’ field and to the right of the Bloomberg Anywhere logo.

If already logged in, the version can be found by first tapping on the MENU button located at the bottom right-hand side of the screen and then tapping the INFO function.

The version number will be on the first line (i.e. 2.4.1).
WHAT IS THE MDID?

MDID stands for “Mobile Device Identifier”. It is a unique identification number for mobile devices.

FINDING THE MDID

1. Click on the MENU button at the bottom right-hand-side of the screen.
2. Click on the INFO tile button.

The MDID number will show on the last line of the list.

If you see “MDID: Not installed” please continue to GENERATING THE MDID ON IPAD (pag.6)

If you see “MDID: Mxxxxx”, your iPad is ready to have Transactional Products enabled.

Please provide the MDID to your APOD administrator.
GENERATING THE MDID

1. Tap on the MENU button and launch the Terminal mode by tapping the “Terminal” tile.

After having successfully logged in on Terminal mode, you will see the below screen:
2. Run **OFF<Go>** and click on **YES** to confirm you wish to log off.

![Confirm Logoff]

3. Once back on the main screen of the app, tap the **MENU** button.
4. Tap the **INFO tile button** and you will now see the MDID installed.

Please be aware that it may take few second for the system to generate the MDID number.

![Info]

Once an MDID is listed, please provide it to the designated APOD Administrator within your firm. They will need to follow the steps on ENABLE TRANS POD FOR MOBILE DEVICES (pag.9) to enable the device for Transactional Products.
UNINSTALLING THE MDID

Please be aware that the following steps will remove the MDID from the device and the ability to use Transactional Products (until another MDID is generated).

1. Tap on the MENU button.
2. Tap on the INFO tile button.
3. Tap on the MDID line.
4. Tap on Uninstall to proceed.
5. The MDID is now completely removed.
ENABLE TRANS POD FOR MOBILE DEVICES
(for APOD Administrator)

Once the user has provided the APOD Administrator with their MDID, the administrator can enable the Transactional Products by following the steps below.

Please be aware that the MDID generated could take up to 30 minutes to show on APOD<Go>.

Search by MDID

1. On the Terminal, run APOD<Go> and select 7) APOD M to find the mobile device by ID.

2. Enter the device MDID that the user provided.
3. Click on **95) Allow Trans. Products** to enable Transactional Products.

![Image of Allow Trans. Products](image1.png)

4. Select **YES** to allow Transactional Products.

![Image of Setting Change Confirmation](image2.png)

The MDID record will now display with Transactional Products allowed and Option 95 can now be used to block Transactional Products.
Search by users in your firm

1. On the Terminal, run \textit{APOD<Go>} and select 2) \textit{APOD F} to search by users in your firm.

2. Change the “Show” drop down menu to only show Mobile Device.
3. Click on 95) *Allow Trans. Products* to enable Transactional Products.

![Image of Bloomerang interface showing option to allow Transactional Products]

4. Select *YES* to allow Transactional Products.

![Image of Bloomerang interface showing confirmation to allow Transactional Products]

The MDID record will now display with Transactional Products *allowed* and Option 95 can now be used to block Transactional Products.

---

*Note: The text is a description of steps to allow transactional products in a software interface. The images provided show the actual interface where these steps are executed.*
DISABLE TRANS POD FOR MOBILE DEVICES  
(for APOD Administrator)

1. On the Terminal, run APOD<Go> and select 7) APOD M to find the mobile device by ID.

2. Enter the device MDID that the user provided.
3. Click on “95) Block Trans. Products” to disable the Transactional Products.

4. Select “YES” to block Transactional Products.

The MDID record will now display with Transactional Products Not Allowed and option 95 can now be used to enable Transactional Products.
